

PRIVATE BETA PLAYTEST

A quick reference for invited testers

THE CHOSEN QUEST ENHANCED | V0.7.0-BETA.2

1. DOWNLOAD AND START

Download: Use the release page or scan the QR code on the right. Extract the ZIP before launching.

Windows: Double-click Launch The Chosen Quest.bat.

macOS: Double-click Launch The Chosen

Quest.command. If blocked, Control-click, choose Open, then confirm.

Linux / Chromebook Linux: Make the .sh launcher executable, then run it.

2. MINIMUM REQUIREMENTS

Java 8 or newer - install from adoptium.net if needed

About 250 MB free disk space

1280 x 720 minimum; 1440 x 900 recommended

Desktop Windows, macOS, Linux, or Chromebook

Linux environment

3. ESSENTIAL CONTROLS

WASD move | Arrow keys alternate movement

1-7 combat actions and abilities | M world map

- / + map zoom | Escape close overlay

Gear icon settings and manual Check Updates action

4. WHAT TO TEST

Try different race, class, and starting weapon combinations. Explore the fog-aware map, follow rumors, visit vendors, clear the Spider Nest, identify relics, and challenge elite and boss encounters. Note anything confusing, too easy, too punishing, slow, visually broken, or unexpectedly fun.

5. SUGGESTED 30-MINUTE ROUTE

Create a new hero and note the starting build. Explore until you reach a vendor and one standard fight. Test inventory sorting and equipment comparison. Follow a rumor or map clue. Open the full world map with M. Attempt one elite objective or the Spider Nest. Finish by submitting the feedback form, even if nothing broke.

RELEASE AND REPORTING LINKS

GENERAL FEEDBACK

<https://forms.gle/GJLCPtzP7LN9PeBeA>

REPORT A BUG

<https://forms.gle/F8LtxPn5sKbwPAxX9>

A USEFUL REPORT INCLUDES

Operating system and Java version; race, class, level, and loadout; exact steps before the problem; what you expected; what happened; whether a reload reproduces it; and a game-window screenshot for visual issues.

UPDATE FEATURE BASELINE

In Settings, choose Check Updates. Before the next patch exists, this build should report v0.7.0-beta.2 as current. Keep this copy installed. After the next beta is published, relaunch it and verify the update notice, View Changes, Remind Me Later, and official Download handoff.

BETA EXPECTATIONS

This is an unfinished private beta. Saves may change. Do not include passwords, private messages, or sensitive information in reports. Share the invite only with people the project owner has invited.
